

TECHNI Filtration joins the Pemflow group!

TECHNI Filtration has offered expertise and know-how in filtration and separation techniques for more than two decades. Whether for consulting, studies, process analyses or technical support, TECHNI Filtration has built up in-depth knowledge of its customers' operations to provide the most suitable filtration solutions for liquids, air or compressed gases.

Your satisfaction and trust have always been the driving forces behind our growth. Convinced of the challenges ahead, it was important for us to offer you even more innovation and technical expertise. With more than 100 employees and 8 companies in Belgium, France and Italy, our integration into the Pemflow group is a logical step. More than ever, we can now distribute the group's products and offer you the technical support you need, backed by our engineering and manufacturing capabilities.

Today, the Pemflow group is present on 5 continents, in more than 35 countries and is a European player with 90 years of recognised industrial expertise.

Thanks to the synergies generated by this new organisation, we can offer you a wider range of filtration solutions while allowing you to benefit from our various services essential to your process, such as cost optimisation and responsiveness, some of the pillars needed to serve today's demanding industries.

If you have any questions, do not hesitate to contact us through the familiar channels such as your personal contact, the form on [our website](#) or via our e-mail address : info@technifiltration.be

This integration does not change our contact details or our administrative identity. Your contact persons remain the same and nothing changes about the company or the products offered in the range; on the contrary, the range is expanded.

We remain at your service to answer your questions and requests in the best possible way, as we have been doing for almost 25 years.

Kind regards,

The TECHNI Filtration team
